

Teledyne Marine Launches a New Platform for ROV Visualization and Control at OTC

DAYTONA BEACH, Florida - 1 May, 2017 - Teledyne Marine introduces a partnership with Greensea Systems, Inc that unites the intelligence of Greensea's proven OPENSEA™ platform with many of Teledyne's key technologies. Teledyne Marine Workspace ROV provides customers with a single user interface that enables added functionality and intelligent operation to Teledyne's market leading imaging, instrumentation, and navigation solutions for a range of remotely operated vehicles (ROVs) from observation class to work class.

Teledyne Marine Workspace ROV introduces a fully customized interface for ROVs with proven system-level solutions and built-in intelligent capabilities. Incorporation of the OPENSEA architecture enables complete access to support for a vast array of devices and offers modular applications for navigation and vehicle control that increase functionality.

Bowtech video can include system data for a superior customer deliverable, BlueView sonar can be georeferenced and streamed to shore, integrated mission planning with Benthos' USBL, and the navigational precision of an RDI DVL can be augmented with inertial navigation. With one operating platform visualized through one user interface, Teledyne Marine offers a robust, distributed framework for managing today's complex robotic environments.

Enable your remotely operated vehicle to "See More" and "Do More" with Teledyne Marine Workspace ROV powered by Greensea. See us at OTC in booth # 3227, [click here to download the brochure](#), or contact us at info@teledynemarine.com for more information.

About Teledyne Marine

Teledyne Marine is a group of leading-edge subsea technology companies as part of Teledyne Technologies Incorporated. Through acquisitions and collaboration, over the past ten years Teledyne Marine has evolved into an industry powerhouse, bringing cutting-edge technology together providing total solutions to our customers. Each Teledyne Marine company is a leader in its respective field, with a shared commitment to providing premium products backed by unparalleled service and support.
