

Production Technician Assembly

Greensea is the creator of OPENSEA, an open architecture software framework for marine robotics, and is a world leader in navigation and autonomy technology. We develop software and hardware that revolutionizes the working relationship between people and machines both on and under the sea. We are known for innovative and powerful technology designed for in-the-field success—and for the can-do attitude, hands-on approach, and proven ability to get the job done of the people behind it. Greensea currently seeks a dynamic, top performer for a fast-paced technical environment. If you are excited to solve really hard problems, dedicated to ‘getting it done’, and confident enough to work alongside the best of the best, then we’d like to talk to you.

Job Description

The Production Technician will assist in the assembly and testing of Greensea products, components, and systems. They will be a critical member of our multidisciplinary production team. They will work primarily in the lab, executing production-related tasks in accordance with Greensea standards and procedures. The successful candidate will strive for on-time and defect-free assemblies and offer nothing short of 100% effort in doing so. This position reports to the Production Manager.

Responsibilities

- Work independently and participate as a multidisciplinary production team member
- Build subsea and surface robotic systems and associated assemblies
- Assist in the maintenance, troubleshooting, and service of existing robotic control systems and components
- Produce clear and useful documentation for production and QA/QC procedures
- Support engineering staff and field testing as necessary
- Maintain a safe and neat work environment

Requirements

- Associate’s degree in a technical field preferred (Electrical/Electronic Engineering). Applicants without degrees but with suitable experience and demonstrable skills will also be considered.
- Working knowledge of schematic diagrams, electric and electronic test equipment, AC and DC theory, Ohm’s law, electronics, and general build processes, including, but not limited to, soldering, wiring, PCB handling, and basic sheet-metal fabrication
- Proficiency with safe and proper operation of basic electrical test equipment, electronics tools, and shop tools
- Strong communication skills, attention to detail, focus, and precision
- Positive attitude and the ability to work both independently and as part of a team

To apply, please send your resume, salary requirements, and cover letter to careers@greensea.com as PDF documents. The candidate must be eligible to work in the United States. This position is based in Richmond, Vermont and cannot be performed remotely. This position may require some occasional travel.

Greensea (www.greensea.com) is an equal opportunity employer. We offer a casual and fun work environment and provide our employees training and continuing education opportunities. Greensea offers competitive salaries and a complete benefits package including full health insurance, paid vacation, a 401k plan, and sick leave.
