

Software Release Coordinator

GreenSea is a world leader in navigation and control technology for marine robotics. We develop software and hardware revolutionizing the working relationship between people and machines on and under the sea. Our technology gives robotic systems the intelligence to work autonomously and operators the tools to effectively communicate with them. GreenSea's business includes commercial navigation and control products, research and development, and large custom developments for some of the most demanding and spectacular projects done beneath the ocean. We are known for our innovative and powerful technology — and the people behind it.

GreenSea currently seeks a dynamic top performer for a fast-paced technical environment. You'll support projects such as a new diver propulsion device, sonar data processing systems, or a hybrid remotely operated vehicle going to the bottom of the ocean. If you are dedicated to getting it done, and confident enough to work alongside the best of the best, then we'd like to talk to you.

Job Description

The Software Release Coordinator is a member of the Engineering team and is responsible for the testing, verification, and release processes for GreenSea's software products. They work closely with stakeholders from Engineering, Product Development, and Sales to coordinate the on-time and quality release of software to Production. The Software Release Coordinator is expected to completely own the software release lifecycle, including verification, testing, QA/QC, documentation, licensing, release, and release documentation. They will be agile, collaborative, and focused with an extremely deep technical understanding of GreenSea's software product and will be wholly committed to delivering a quality product. This entry level position reports to the Engineering Manager.

Responsibilities

- Manage and participate in software QA and verification at all stages of the development process
- Develop and maintain automated software QA and deployment tools
- Coordinate software release process to ensure timely, quality, releases
- Deploy software to Production
- Manage release process
- Coordinate software licensing with Sales

Requirements

- Bachelor's Degree
- Proficient with Linux and Windows
- Proficient with modern software development processes and concepts including continuous integration and agile management
- Proficient with basic system administration, desktop software tools, and online collaboration tools
- Experience with continuous integration processes and tools, Jenkins preferred
- 3+ years experience in a technical role
- Excellent oral and written communication with the ability to interact effectively with a range of stakeholders from management to technical staff
- Highly organized with excellent time management skills
