

Software Release Coordinator

Greensea is the creator of OPENSEA, an open architecture software framework for marine robotics, and is a world leader in navigation and autonomy technology. We develop software and hardware that revolutionizes the working relationship between people and machines both on and under the sea. We are known for innovative and powerful technology designed for in-the-field success—and for the can-do attitude, hands-on approach, and proven ability to get the job done of the people behind it.

Greensea currently seeks a dynamic, top performer for a fast-paced technical environment. You'll support standard software products for Remotely Operated Vehicles (ROVs), Autonomous Underwater Vehicles (AUVs), and diver mobility systems. You will also support research and development programs in new technology for marine robotics. If you are excited to solve really hard problems, dedicated to 'getting it done', and confident enough to work alongside the best of the best, then we'd like to talk to you.

Job Description

The Software Release Coordinator is a member of the Engineering team and is responsible for the testing, verification, and release processes for Greensea's software products. They work closely with stakeholders from Engineering, Product Development, and Sales to coordinate the on-time and quality release of software to Production. The Software Release Coordinator is expected to completely own the software release life cycle, including verification, testing, QA/QC, documentation, licensing, release, and release documentation. They will be agile, collaborative, and focused, with an extremely deep technical understanding of Greensea's software product, and will be wholly committed to delivering a quality product. This entry-level position reports to the Engineering Manager.

Responsibilities

- Manage and participate in software QA and verification at all stages of the development process
- Develop and maintain automated software QA and deployment tools
- Coordinate the software release process to ensure timely, quality releases
- Deploy software to Production
- Manage release process
- Coordinate software licensing with Sales

Requirements

- Bachelor's Degree
- Proficient with Linux and Windows
- Proficient with modern software development processes and concepts, including continuous integration and agile management
- Proficient with basic system administration, desktop software tools, and online collaboration tools
- Experience with continuous integration processes and tools, Jenkins preferred
- 3+ years of experience in a technical role
- Excellent oral and written communication and the ability to interact effectively with a range of stakeholders from management to technical staff
- Highly organized with excellent time management skills

To apply, please send your resume, salary requirements, and cover letter to careers@greensea.com as PDF documents. The candidate must be eligible to work in the United States. This position is based in Richmond, Vermont and cannot be performed remotely.

Greensea (www.greensea.com) is an equal opportunity employer. We offer a casual and fun work environment and provide our employees training and continuing education opportunities.
